🎓 EDUCATION

Computer Engineering

Faculdade Impacta [🔗](#)

2021 – 2024 | Sao Paulo, Brazil

I developed a cargo monitoring system, integrating a smart lock and real-time route tracking. I used Next.js for the Front-End and NestJS for the Back-End to build a robust application focused on real-time tracking and logistics security.

💼 PROFESSIONAL EXPERIENCE

Beesby [🔗](#)

Developer

07/2021 – present | Sao Paulo, Brazil

Intern - Service Provider: 07/2021-12/2022

I initially worked as an analyst, handling technical support tickets for a major health insurance company (UNIMED).

Full-Stack Developer - Service Provider:

01/2023 - Present

Contributed as a Full-Stack developer to a risk management application project for one of the largest cement companies. Developed responsive and modern user interfaces, implemented APIs, and business logic. Gained experience in database management, server-side processing, and system integration, with a focus on performance optimization and scalability. (Votorantim Cimentos)

Contributed as a Full-Stack Developer on an AMS project for one of the largest chemical companies in South America. I am responsible for implementing improvements and fixing bugs. I have experience analyzing logs through Azure Application Insights, managing and replacing digital certificates, and developing responsive user interfaces focused on user experience. I also conduct technical investigations through database queries, identifying root causes and proposing solutions aligned with business needs. (Unipar)

Participated in a full-scale enhancement project and the development of new features for a platform dedicated to organizing children's parties. Contributed to improving the user experience and expanding system capabilities to support broader functionality. (Bid Kids Party)

Experience with: HTML, CSS, JS, Angular, React, C#, .NET, Git, NPM, MongoDB, Azure, SQL SERVER, Yarn.
